

1 On your desktop, right click on an empty space. Go to “New” and click “Folder”. A folder will appear with highlighted blue text. Type in the patient name and push “Enter” on your keyboard.

2 In your PreXion, right click on the patient’s name and go to “Study Management” and click “Download Study”.

3 Select the folder you just created on the desktop. Click “OK” to export the images.

4 After the DICOM exports and saves, go to the patients folder and verify the .dcm files were exported correctly; there should be several hundred files.

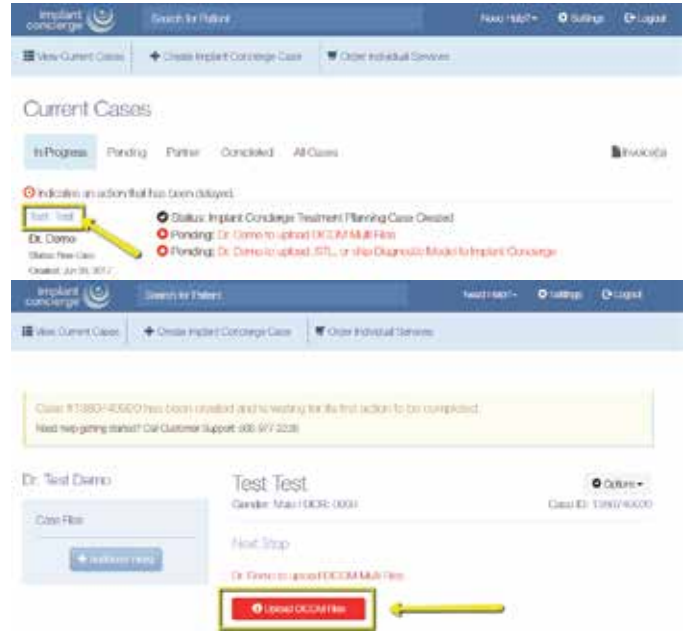

5 Go back to the desktop, right click on the patients folder, go to “Send to”, and select “Compressed (zipped) folder”. A duplicate folder will be made with either a zipper on it, or a blue “Z”.

* If following a Dual Scan Protocol, please zip scans individually and label accordingly; i.e: “Patient Scan” and “Denture Scan” *

6 To upload the compressed folder, login to Implant Concierge. Click on the patient's name to open the case. Click on the red "Upload DICOM" button.

7 Drag and drop the folder from the desktop to Implant Concierge. The file will automatically begin uploading.

8 Once the file reaches 100%, click the green “Complete” button.
